Scan barcodes with ease at a simple press of a button.

Clear/Function Key

Barcodes can be removed with the clear button. Simply hold and scan the product you would like to remove.

USB Connectivity

Laser Engine

The scanner emits beeps and sounds - informing you when your scanned barcode has been saved.

Weight = 30 grams.
ACTUAL SIZE

USB connectivity provides ease in uploading the items on to your computer. You can also charge the scanner through USB. Charging an empty battery takes about 2.5 hours.
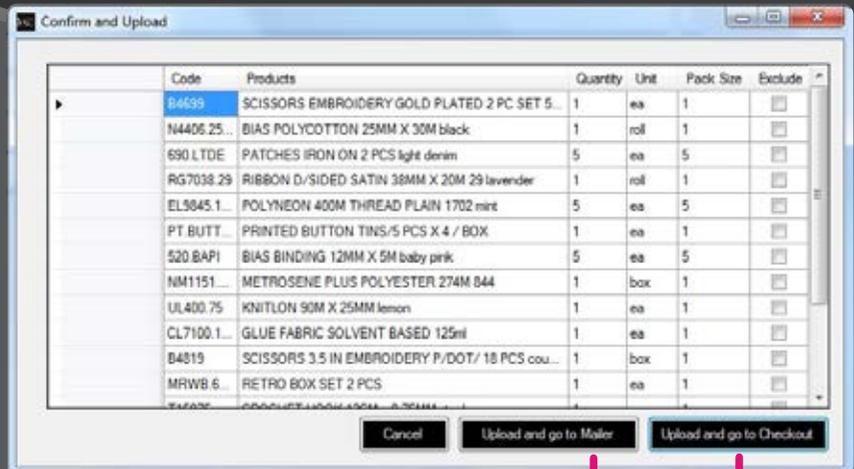

The laserbeam provides fast barcode scanning.

Ordering has never been easier...

Walk around the store with ease with this lightweight, matchbox-sized scanner. With a simple push of a button you can scan in your order and then upload it to the SSS Website. This system is so flexible that you can remove or add items at any point before checkout. Your order then arrives directly to SSS, ready to be picked and packed.

We've done all the hard work for you so that you can spend more time running your business.

The SSS Software collects the information scanned and generates a list. From here, you can then choose to add products from the SSS mailer or proceed straight to checkout.

Have the freedom of adding current mailer specials to your order.

You can review your items and make changes before placing the order.

We've got it all sorted for you.

Missing barcodes can be provided by SSS on request. We've made a list of barcodes to help you keep track of the products in your store. Full ranges are available on cardstock or adhesive paper for easy ordering.

Scanners will help you utilise your rep!

You can now easily place orders between rep visits ensuring you do not miss out on sales due to being out of stock. With time saved on orders, your rep has more time to discuss your needs, new products and ensure our ranges look immaculate in-store, in turn, producing more sales.

Getting started is easy.

SSS will provide all the software on our Website. Simply download the software, and install on your computer. If required, Installation is also available on multiple computers.
